

LUCIDA BEACH HOTEL

SUSTAINABILITY REPORT

➤ OUR SUSTAINABILITY POLICY

For a sustainable world; We attach importance to the evaluation, resolution and feedback of suggestions and complaints from our guests.

In line with the understanding of sustainability, we conduct our trainings in order to raise awareness of our employees and contribute to their development, and ensure that they take an active role at every stage.

We comply with laws and regulations in all our activities.

► OUR ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

We evaluate the environmental impact and dimension of our activities within the framework of legal regulations and work to minimize our impact.

We make evaluations at the purchasing stage to reduce our waste at its source. We separate our wastes according to their groups and hazard classes in the most efficient way.

We deliver our waste to licensed companies in accordance with its class. We aim to reduce the amount of waste. Waste segregation, zero waste etc., we provide training to our personnel on the issues, We carry out the necessary infrastructure works for the effective use of our natural resources and aim to reduce them by following them regularly. We raise awareness about the conscious use of our natural resources by our guests and employees.

► **OUR PURCHASE POLICY**

We contribute to the protection of nature by choosing the ones with "recycling" and "environmentally friendly" labels in the materials we buy at our hotel.

We contribute to the regional economy by supplying products/goods from local suppliers, and we aim to continuously increase the ratio of our local suppliers.

We make purchases in accordance with the rules and instructions set by the Ministry of Agriculture and Forestry.

► OUR CULTURAL AWARENESS POLICY

We inform our guests so that they can access the natural and cultural heritage, local products and services in our region.

We know that visitors coming for both touristic and working purposes contribute to regional development with their different cultures and that hospitality should be shown.

We support all our interest group in introduce to know the region's food, activities, culture and traditions, (religious-cultural places, natural riches, etc.), train our staff, and inform our guests.

► OUR ACCESSIBILITY POLICY

We carry out our activities by considering convenience for individuals with special needs (disabled, children, etc.) to access our products and services. In our sustainability management system, we constantly monitor and measure our practices and targets and initiate, plan and finalize our corrective actions when necessary.

We care about accessibility, health and safety standards for all our guests, staff and visitors with special needs, physical sensitivities and difficulties, and we organize the environments where they spend their holidays or work in line with these standards.

We inform our interest group about all the issues we specify in our policies and ensure their involvement.

Our sustainability message;

As LUCIDA BEACH HOTEL family; We need your support in order to transfer our resources to future generations and to use them in the most efficient way. We are aware of our debts to nature, the environment and humanity. We invite our guests, staff, suppliers and all our interest group to sensitivity.

History

- **King of Pergamon** in the **Hellenistic period**. **Attalos** (159-138) tells his soldiers, "Go and find me the heaven on earth." II, who liked the place his soldiers showed. Considering the strategic importance of the region, Attalos had a port city built here, and the city was named "Ataleia" after its founder Attalos. Ateleia means "Home of Attalos".
- Antalya and its surroundings have the legacy of two lifestyles that have been floating for centuries. When the Turks first came here, they immediately followed the settled order; They established villages, towns and cities. A part of the population, on the other hand, continued the nomadic life as before the Turks came to Anatolia.
- They raised animals such as camels and sheep and made a living by exchanging or selling the products they produced with the products of the settled people. They produced meat, milk, oil, and weaving hair tents and rugs with natural madder. There were even those who planted grains and vegetables in narrow areas in the winter quarters. There were even large groups of nomads (tribes) raising horses for the Ottoman army.
- **Manavgat Waterfall:** It is located in Manavgat district of Antalya.
- Nature-waterfall, which has a magnificent view of nature
- The river, which allows you to experience adventure in its landscapes,
- At certain stages, various nature sports such as rafting and canoeing can be done.

Side Ancient City: The Ancient City of Side is 80 km from Antalya. east of Manavgat, 7 km. It was founded on a peninsula with a width of 350-400 meters in the southwest. Side, the most important port city of Pamphylia in ancient times, is located in the Manavgat district of Antalya. Side VII. century, it became a settlement center. Side Antique City is a city where many communities such as Lydians, Seleucids, Pergamon Kingdom, Roman Empire and Cretans lived and was known as a trade and port city. B.C. There are many historical buildings that can be visited in the city, which was built in the 8th century BCE. Among the structures that can be seen around the ancient city, there are important works such as walls, city gate, agora, ancient theater, bath houses, temples, basilica, Temple of Apollo, Temple of Athena.

Side Apollon Temple: The temple, which was built in the name of Apollo, known as the god of beauty, art and poetry in Greek mythology, has a special importance among the historical places to visit in Side today. The columns with Corinthian caps on the building have motifs that require very fine workmanship and fascinate them. CE The building, which was built in 150 years, underwent a small restoration in 1990 and took its present form. The temple, which has many historical ruins around, is visited by tourists every season of the year, as it has a unique Mediterranean view. Along with the sea view, there are also areas where you can take walks around the Temple of Apollo, immortalized by the visitors with their cameras.

- **Saklikent Canyon:** Located between Antalya and Fethiye borders, Saklikent Canyon has a total length of 18 kilometers. If you want to plan a trip intertwined with nature, forest areas formed by red pine, cedar and larch trees can also be seen in Saklikent Canyon, where you can have a very pleasant time. In order to protect our nature, take care to choose sunscreen, perfume, skin care products and the like from nature-friendly products. Do not forget that the chemicals of the conditioner may harm the underwater creatures.

Kurshunlu Waterfall Nature Park: It is located within the borders of Aksu district of Antalya. Kurshunlu Waterfall, where 7 ponds converge and spill, pours from a height of approximately 20 meters. The waterfall, which is one of the indispensables of Antalya holiday with its refreshing effect and the emerging view, was opened to visitors in 1991 as a nature park.

Göynük Canyon: It is located in Kemer district of Antalya. It is located on the Lycian Way, which is shown as one of the world's top 10 long-distance walking routes by various sources. The pond creates an impressive landscape with its lush green waters.

Köprülü Canyon National Park: Köprülü Canyon National Park, located in the Bozyaka neighborhood of the Manavgat district, is 25 km long. Köprülü Canyon, which impresses visitors with its natural beauty, is Turkey's most popular rafting area. Rafting is a fun and exciting river sport that is done with boats called raft on rivers with high flow.

Kekova Island: It is located in the Demre district of Antalya. There is no construction on Kekova Island, where you can both enjoy the sea and organize historical excursions during your Mediterranean vacation. There are sunken ancient cities around the island, which offers a very impressive visual feast with its turquoise sea.

Incekum Nature Park: It is located in Alanya district of Antalya. It stands out among the important natural beauties of Antalya. Located at a unique point where the greenery of the forests meet the blue of the Mediterranean, the park is one of the ideal spots to spend time away from the city life and in a quiet way.

Çıralı Yanartaş: It is located in Kemer district of Antalya. Located at the foot of Çataldağ, one of the natural beauties of Kemer, Çıralı Yanartaş has quite impressive features. The fire burns 24 hours a day in the area where the constantly burning methane gas can be seen between the rocks on the top.

Tazi Canyon: It is a canyon valley located in Manavgat district of Antalya province. Located within the borders of Köprülü Canyon National Park, Tazi Canyon was formed by the erosion of the Köprücay Stream. It is estimated that the formation of the canyon dates back to the ice age. It was formed by carving the inside of the limestone rocks in non-calcareous regions as a result of the ice masses separating from each other and melting and creating erosion with great energy and releasing itself into the valleys. The length of the canyon is 4 km.

Düden Waterfall: Due to its fascinating natural beauty, Düden Waterfall is one of the most visited tourism centers in Antalya. According to a rumor in 334 BCE, it is said that the commander Alexander the Great watered his horses here when he was going to conquer the Pamphylia region. There are 2 waterfalls, Lower and Upper Düden.

Our environmentally friendly purchasing activities;

When choosing our supplier companies, we check whether they comply with the locality, environmental sensitivity and fair trade concept and make the evaluation according to these criteria. We prefer bulk products instead of packaged products,

We take care to buy our drinks postmix (min 10 lt) or keg (50 lt). We contribute to the regional economy by choosing our suppliers locally, and we aim to reduce our waste by reducing the amount of disposable products.

As LUCIDA BEACH HOTEL family;

Our facility has been designed in such a way that disabled guests can have a comfortable holiday experience. Special parking area is available. There are wide corridors and elevators in our facility. In addition, we also have special rooms according. These rooms are equipped with features such as wide doors suitable for wheelchair use, handycap bathrooms, and areas to move freely. Sustainability Report

Our Water Risk Map

According to the statement made by the Wildlife Conservation Foundation, it was pointed out that Antalya is on the list of cities with high water risk in the world, therefore, we must stand against approaches and unsustainable practices that ignore nature and do our part while carrying out our activities in the management of water resources. Therefore, as an enterprise that has adopted the principle of protecting our natural resources and using them in the most efficient way. We have to raise awareness and contribute by providing the necessary training to our personnel and informing our guests.

Sustainability Report

➤ **Our water saving practices;**

- Aerators that save 25% water were installed in showers and overhead showers in customer rooms.
- Bathroom faucets were renewed and product-saving aerators were selected.
- Toilet floats were renewed and the water capacity was adjusted to 3 liters.
- Photocell batteries were installed in general WCs.
- Arrangements were made in garden irrigation sprinkler and drip irrigation systems.
- The heating boiler of the hot water system was canceled and turned into a gas floor condensing system.
- Saving products were preferred in the products purchased.

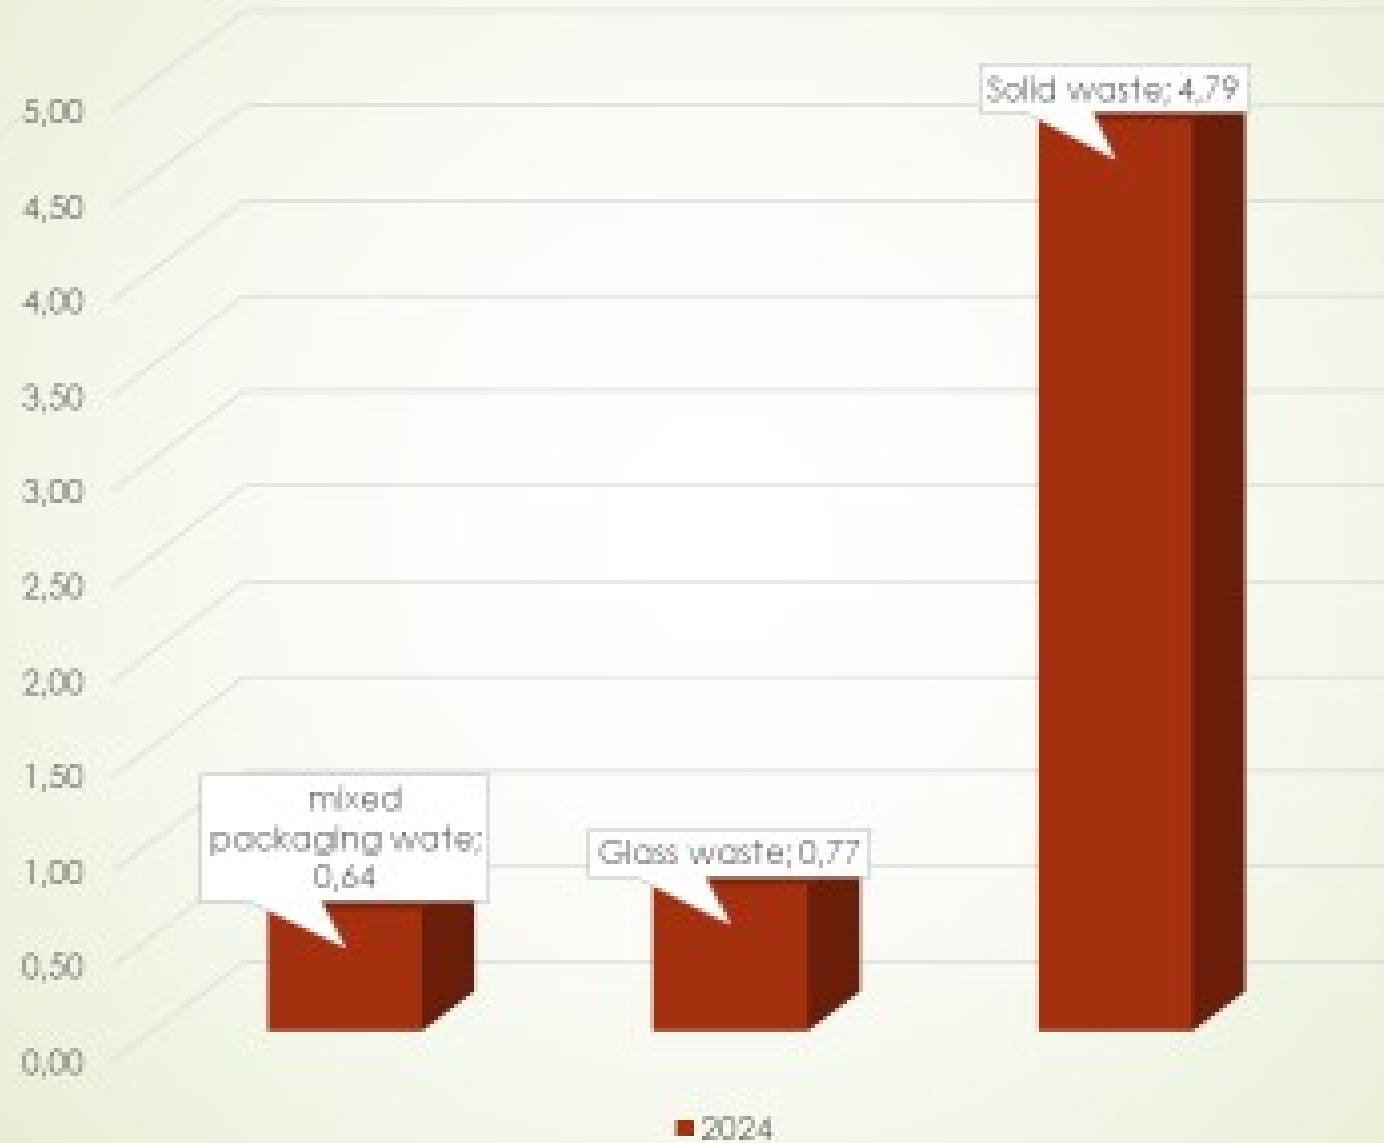

Waste Management

- We don't support recycling by segregating waste on site, and we work with licensed waste companies in this context.
 - We collect our wastes, which are separated according to their type, in appropriate storage areas, and then deliver them to the licensed companies we work with.
